

Ms. Helga Leifsdottir

30 Waterside Plaza
Apt. #29A
New York, NY
10010

Dear Ms. Helga Leifsdottir,

My name is Pietro I am a 6th grader at the United Nations International School. My class created an executive report template to use so that we can make changes about issues all around the world. In addition, we studied the UN Millennium Development Goals. When I saw the presentation for “Combat HIV, Malaria and Other Diseases” I was shocked. So I decided to take action on diseases specifically Lung Cancer.

There are many reasons why I picked Lung Cancer. The main reason was because my Grandmother passed away from Lung Cancer. I knew that many more families could get affected so I decided to make change. Did you know that about 375,000 people are living with lung cancer in the U.S and 29% of Cancer deaths are because of Lung Cancer today. Families and friends all over the world lose a friend because of lung cancer. 1.3 million people all over the world die because of lung cancer every year. Lung cancer is responsible to have killed $\frac{1}{3}$ Americans.

I know that you work for the U.N. I was wondering if you can help me spread the issue, maybe at a conference you can talk about my executive report. There are other reports that can also be found at myservicelearningproject.weebly.com

In September I did the “My World” survey I voted for “Better Health Care” because I knew many people all around the world can get life threatening diseases including lung cancer. I want to help save the world and I know you can help me. Please respond to me by email or at my home address.

Sincerely,

Pietro
